

*improving lives*

# WHO WE ARE

In 2006, the Construtora Transvia was founded at City of Leme, country side of São Paulo State. João Luiz Dellai, one of most renowned engineers in the region due the inumerous successfull projects in the areas of water, real state, buildings and infrastructure, joined his son, the engineer André Vêris Dellai, a young, clever and motivated professional, to create a new concept company, based on the high quality of engineering technology associatated to the high standards of business management. The company has grown during the years, becoming one of the most important and reliable players in the region. In 2018, the company understood that it was time to grow to a new level, expanding the operation and exploring new fields and in the end of the year, Fabio Juvenal Ferreira joined the company as the third partner, with the mission of support the company to the next flight level.

# TIME LINE

# WHAT WE DO

Although TRANSVIA is originally a civil construction company, we hold a wide multidisciplinary experience in our field of actuation, since the project conception, project finance & funding, economic models, basic & executive design, procurement, construction and project management, according to the best practices existing in the world.

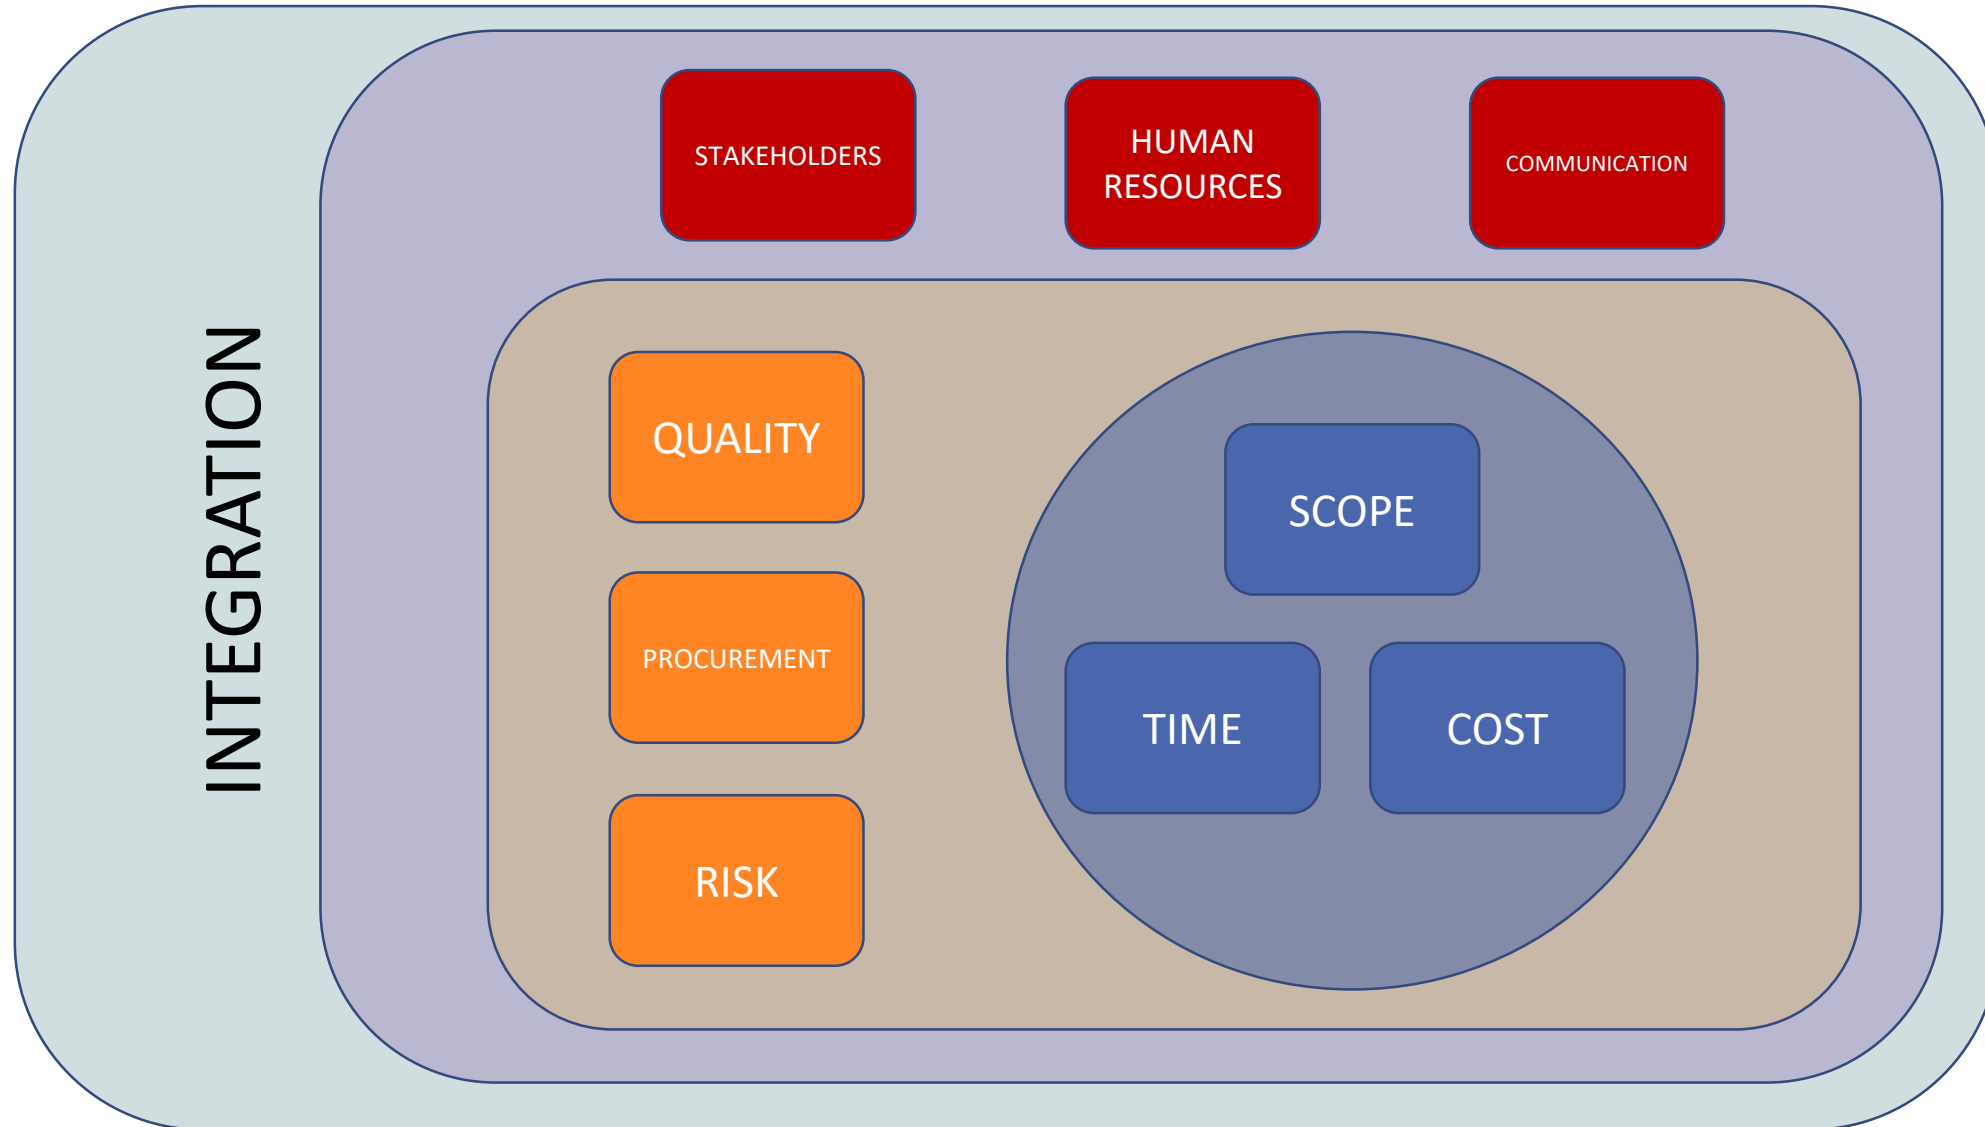

TRANSVIA is a very flexible company and is able to work in several models of partnership, in the fields of:

- Infrastructure
- Water
- Real State
- Buildings

For the disciplines of civil, electrical, mechanical, TI/Telecommunication

# BEST PRACTICES

# WHAT WE BELIEVE

A great history can only be built through strong and clear values. So, the strategy of the company is founded on:

- People are our most important asset;
- Happy people makes the business prosperous;
- High standards of compliance;
- Strong and long term partnerships;
- Real win-win approach with partners, suppliers and clients;
- Fair profitability;
- Technology improves people's lives;
- Social responsibility.
